DENTAL IMPLANTS

ANGULATED ABUTMENT
FOR SMILEA & SMILEA CONIC
IMPLANTS (Ø 3.6).

Range

Smilea Smilea
CONIC

Think Simple

- Angulated Titanium abutment inclined to 14° for externally connected SMILEA & SMILEA CONIC implants.
- Attaches to the implant with a short-headed adapted screw.

Transfixation screw M2 with short head (VT63S).

The reduced space requirement allows the user to gain 2.3mm of total height compared to the SMILEA and SMILEA CONIC classical Titanium abutment for external connection.

Angulated abutment for a range of externally connected implants SMILEA & SMILEA CONIC Ø 3,6 mm (PA30).

Vestibular Zone.

Palate and tongue area.

- The Zirconia collar is partially recovered by the prosthesis.

Angulated 14° retrofit.

Optimised space requirement.

Oval shape that prevents rotation of the prosthesis.
